lab/gondwana/blob/master/LICENSE)
```

3 测试

例如

Branch	Tests	Coverage
master	test 	cov 
develop	test 	cov 

代码示例

```

1 | Branch | Tests
2 | Coverage
3 |
4 | ----- | -----
   | ----- | -----
   | master | ![master test](https://img.shields.io/badge/test-
   |         | passing-success.svg) | ![master cov]
   |         | (https://img.shields.io/badge/cov-58%25-critical.svg) |
   | develop | ![develop test](https://img.shields.io/badge/test-
   |         | passing-success.svg) | ![develop cov]
   |         | (https://img.shields.io/badge/cov-58%25-critical.svg) |

```

4 项目简介

5 重要内容 (通用部分)

```

1  ## A Note on Production Readiness
2
3  While Trias is being used in production in private,
4  permissioned
5  environments, we are still working actively to harden and
6  audit it in preparation
7  for use in public blockchains.
8  We are also still making breaking changes to the protocol and
9  the APIs.
10 Thus, we tag the releases as *alpha software*.
11
12 In any case, if you intend to run Trias in production,

```

```
13 please [contact us](mailto:contact@trias.one) and [join the
14 chat](https://www.trias.one).

## Security

To report a security vulnerability, [bug report]
(mailto:contact@trias.one)
```

6 文档

6.1 website (通用部分)

```
1 ## Documentation
2
3 Complete documentation can be found on the [website]
(https://github.com/trias-lab/Documentation).
```

6.2 Install

```
1 ### Install
2
3 此处是说明或文档链接
```

6.3 Quick Start

```
1 ### Quick Start

3 此处是说明或文档链接
```

7 贡献 (通用部分)

```
1 ## Contributing
2
3 All code contributions and document maintenance are
4 temporarily responsible for TriasLab
5
6 Trias are now developing at a high speed and we are looking
7 forward to working with quality partners who are interested in
```

```

18
19  ### Upgrades
20
21  Trias is responsible for the code and documentation upgrades
22  for all Trias modules.
  In an effort to avoid accumulating technical debt prior to
  Beta,
  we do not guarantee that data breaking changes (ie. bumps in
  the MINOR version)
  will work with existing Trias blockchains. In these cases you
  will
  have to start a new blockchain, or write something custom to
  get the old data into the new chain.

```
